

ML-Based Resume Parsing Solution

About BHSoft

Bac Ha Software Co., Ltd. (BHSoft) is a dynamic and fast-moving company in software development and information technology in Vietnam.

Established in 2014, BHSoft has expanded services to worldwide clients from Europe, America, Singapore, Japan and other countries. BHSoft provides the optimum solution that consistently meets customers' needs and applies the latest technologies on customers' projects to make them the best application.

"A brick to build your goals!"

Overview

1

Situation

An era marked by a deluge of job applicants and increasingly diversified resume formats poses a significant challenge for human resources and talent acquisition teams.

Complications

Manual screening is overwhelming, time-consuming, and inconsistent.

4

Question

How to address these challenges by a more streamlined and efficient solution without compromising accuracy to transform the way recruitment processes are conducted?

Answer

A Machine Learning approach for Resume Information Extraction.

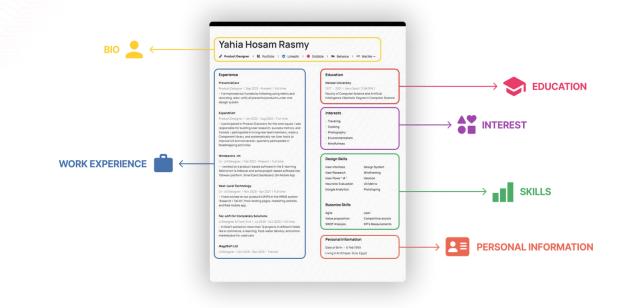

Our ML-Based

Resume Parsing Solution

Detect and extract information from resumes formatted as PDF, DOC and

DOCX with Machine Learning Model.

Technology

Pre-trained NLP models BERT models

Tools Natural Language Toolkit (NLTK), spaCy library

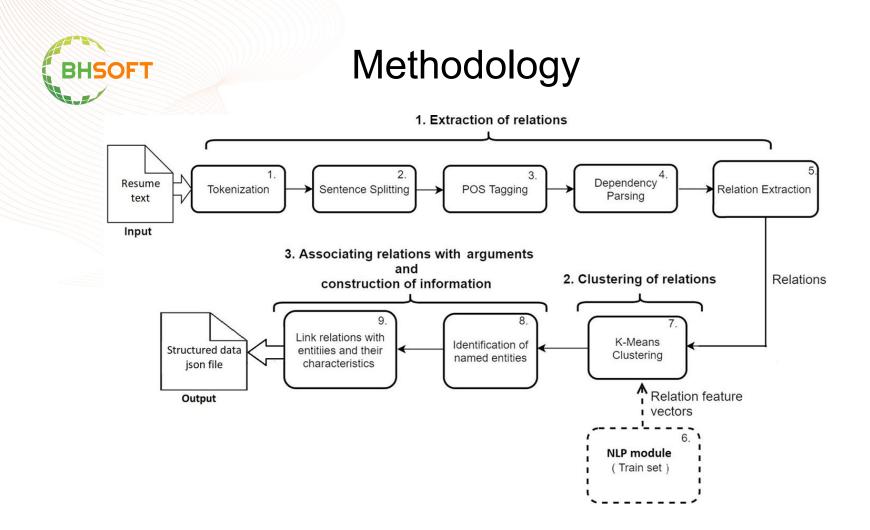

Programming languages Python

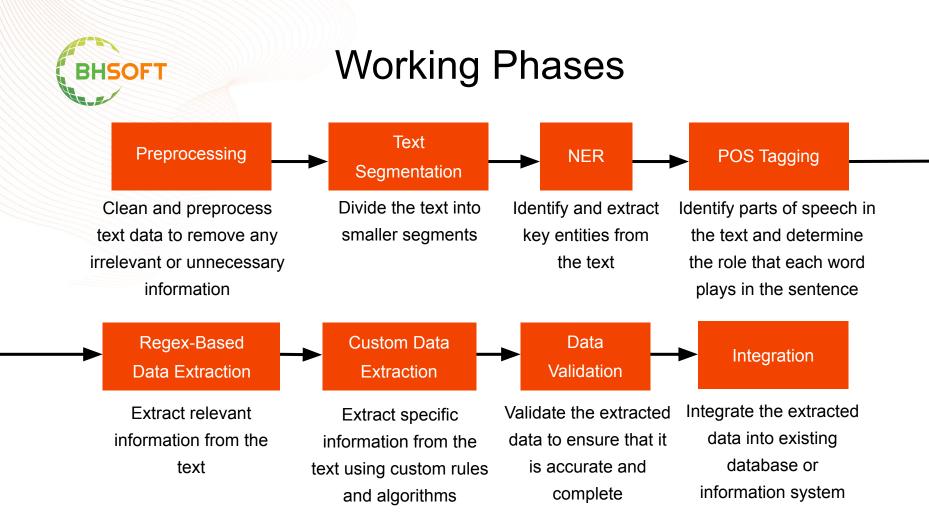

Machine learning BERT, SpaCy, N-gram, Context learning

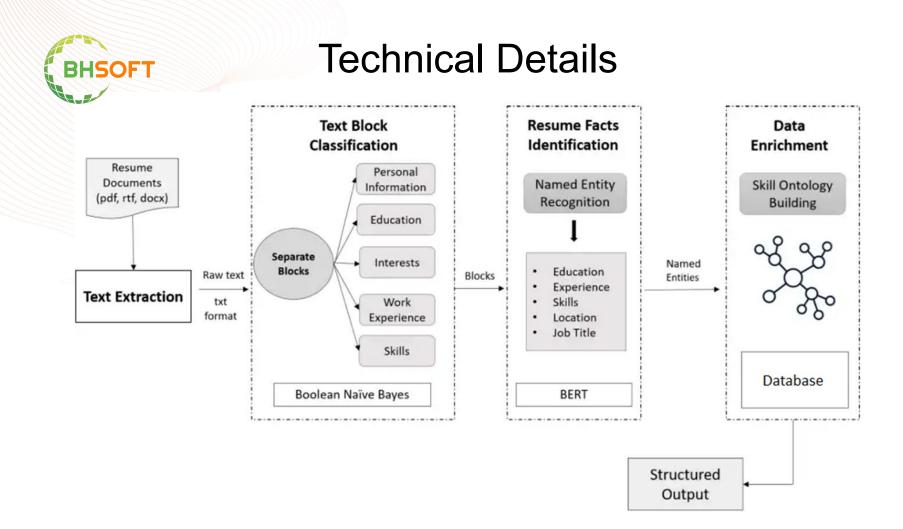

Technique OCR (Optical Character Recognition)

Team size & Duration

Christa Prosacco

4132 S Tamiami Trail, Sarasota, Florida 34231 (941) 922-5196 christaprosaccoo@gmail.com

Professional Summary

- Seasoned Project Control Manager with over 10 years of experience leading project execution strategy and delivery in the oil & gas, biopharma, and chemical industries.
- Core member of project leadership teams accountable for aligning execution with project goals, corporate guidelines, and client needs.
- Successfully executed major capital projects including biopharmaceutical production facilities, oil refinery
 expansions, chemical plant construction, midstream pipeline infrastructure, and storage facilities.

Qualifications

Education

 University Technology of Chemistry BSc (Hons) Chemical Engineering, 2011

Skills

· Primavera, P6 Risk Analysis, Smart Plant/Navis and Milestone Pro

Languages

English, Mandarin

Professional Experience

EYT PRIVATE LIMITED

Project Control & Risk Manager

- Developed and oversaw Global Project Reporting (GPR) aligned with corporate KPIs to provide executive leadership with data-driven project health assessments.
- Established comprehensive project controls and risk management frameworks encompassing workflows, tools, scheduling, progress tracking, budgeting, resourcing, KPI dashboards, risk registers, and status reporting. Ensured adherence to corporate project execution standards, priorities, and client needs.

- Monitored project schedule and cost performance closely against approved baselines and contingency budgets using Earned Value, CPM, and risk analysis techniques. Identified threats to major milestones and incentive goals early to enable corrective actions.
- Led staffing plans for project controls team and mentored junior team members. Developed core project control competencies within the organization.

FSTR ENERGY LIMITED Lead Planning Engineer

(2015-2019)

- Established frameworks and managed all key Front End Engineering Design (FEED) deliverables including schedule, procedures, planning tools, performance metrics, monitoring, and reporting.
- · Identified critical path priorities and aligned closely with project team to support execution needs.
- · Ensured FEED progress reporting complied with project standards and procedures.
- Developed detailed FEED execution schedule, lookahead plans, manpower forecasts, productivity trends, critical
 path analysis, and periodic progress reporting.

FSTR OVERSEA OPERATION LIMITED	(2011-2015)
Lead Planning Engineer	

- · Conducted rigorous schedule risk analysis to identify threats and implemented targeted risk response controls.
- · Implemented planning systems and tools aligned with project execution procedures.
- Identified schedule critical paths to prioritize activities and enable agile response from project teams during construction.
- · Ensured integrity of performance reporting to support data-driven management decision making.
- Developed detailed construction schedules, lookahead plans, manpower forecasts, productivity analysis, risk assessments, progress reporting, and sponsor reviews.

Name of institute & location University Technology of Chemistry

4132 S Tamiami Trail, Sarasota, Florida

- · Seasoned Project Control Manager with over 10 years of experience leading project execution strategy and delivery in the oil & gas, biopharma, and chemical industries.
- · Core member of project leadership teams accountable for aligning execution with project goals, corporate guidelines, and client needs.
- · Successfully executed major capital projects including biopharmaceutical production facilities, oil refinery expansions, chemical plant construction, midstream pipeline infrastructure, and storage facilities.

Period From 2019 Period To

Equipment Required

ML Server Hardware Required

Mainboard Intel W480, Socket 1200, ATX, 4 RAM DDR4

CPU Intel Xeon W-1370P (3.6 GHz turbo up to 5.2 GHz, 8 cores 16 threads, 16MB Cache, Comet Lake-S)

RAM 32GB DDR4

SSD 512GB M.2 + HDD 2TB

GPU RTX3090 (24GB GDD6X, 384-BIT, HDMI +DP, 2X8-PIN)

Summary

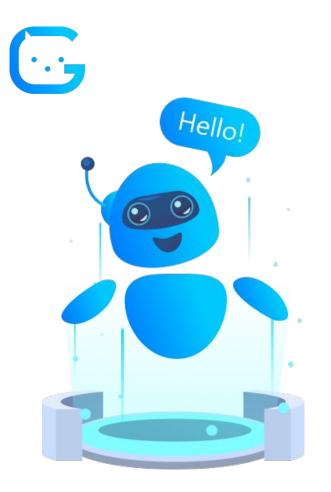

Advantages

The Machine Learning-powered ATS brings substantial advantages to both employers and job seekers.

- To employer: eliminating human error and significantly reducing administrative burden.
- To job seeker: information will be efficiently captured and correctly presented to potential employers, enhances consistency and accuracy.

Potentials

This solution can be applied beyond HR and recruitment. Its continual learning and improvement make it adaptable to other sectors, improving data extraction and understanding of industry-specific terminology for enhanced data processing and analysis in various fields.

GLEAN - AI Chatbot for Eyecare

Situation

Eye diseases are a global health concern, potentially causing severe complications if **not detected timely**.

Complications

Traditional diagnosis methods are often **time-consuming** and **expensive**, hindering access to timely care.

Question

How can we enhance eye disease detection to mitigate these challenges?

Answer

GLEAN - AI Chatbot for Eyecare offers a solution streamlining eye disease detection.

GLEAN - AI Chatbot for Eyecare

Detection and Classification of Eye Diseases by AI Models and Computer Vision Algorithms

Technology

- Library: OpenCV, Yolo
- Techniques: Iris extraction,

Segmentation, Feature extraction

• Environment: NVIDIA Cuda

Programming

- Programming Language: Python
- Machine Learning: Supervised,

unsupervised and reinforcement learnings

Text Processing (NLP)

- Pre-trained models: LLAMA 2
- Attention Transformer
- **Techniques**: Text encoding, self/multi-head attention, semantic analysis

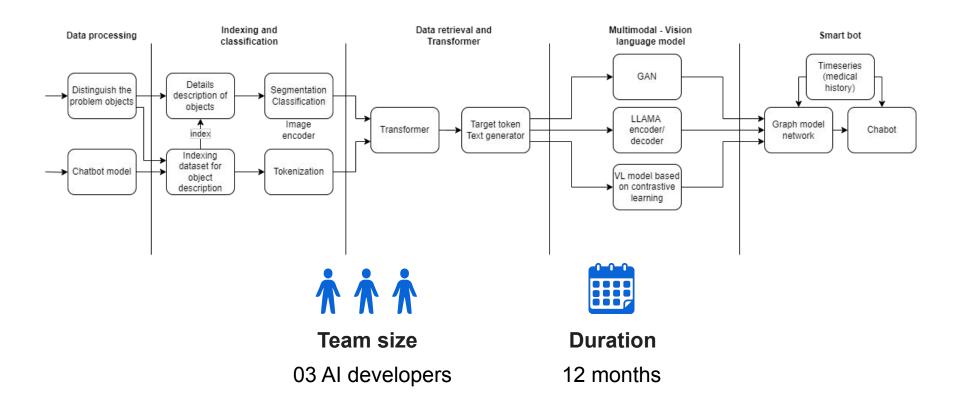

Dev Tools

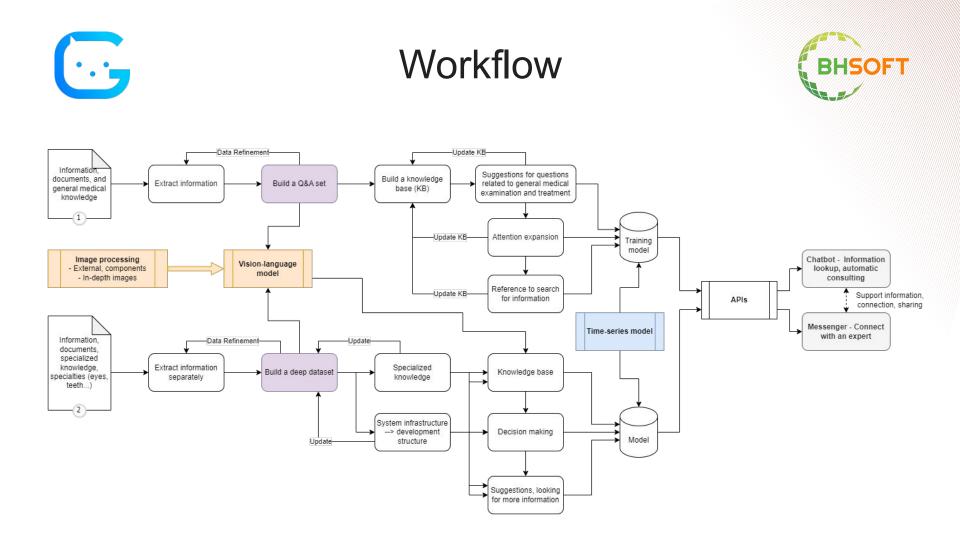

- Web tools: Jupyter, Colab, Huggingface
- Visual Studio Code IDE

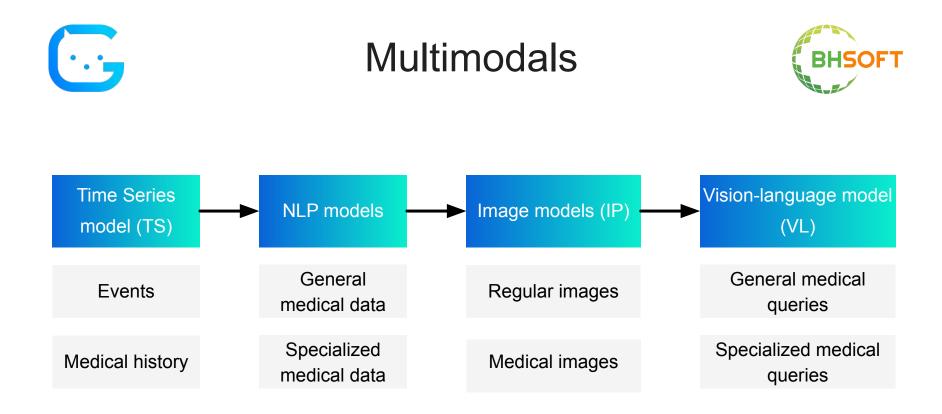

Stages of Implementation

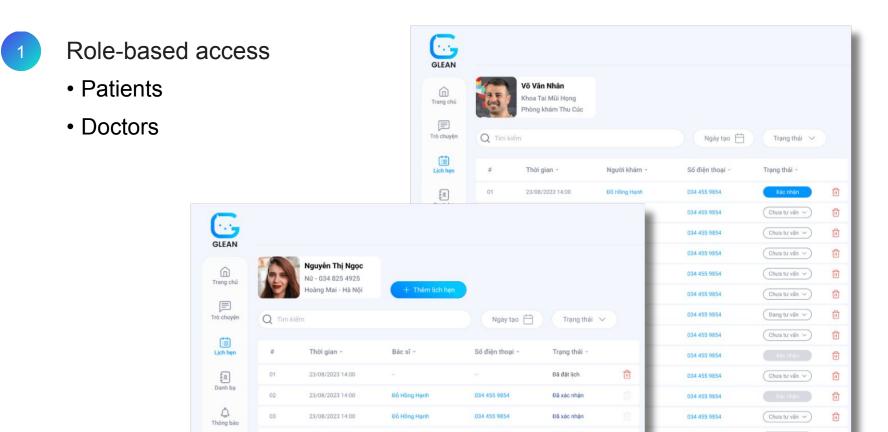

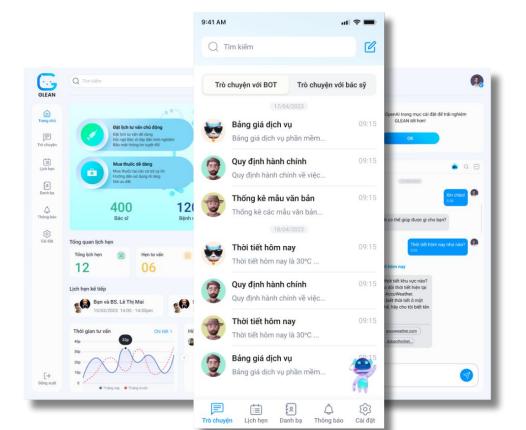

Messenger

- Chat
- Share chats
- Manage contacts
- Save chat history
- Schedule appointments
- Create groups

Notification

- New messages
- Coming calls
- Appointments
- Friend list updates

Image recognition & language processing through images

Equipment Required

ML Server Hardware Required

Mainboard Intel W480, Socket 1200, ATX, 4 RAM DDR4

CPU Intel Xeon W-1370P (3.6 GHz turbo up to 5.2 GHz, 8 cores 16 threads, 16MB Cache,

Comet Lake-S)

RAM 32GB DDR4

SSD 512GB M.2 + HDD 2TB

GPU RTX3090 (24GB GDD6X, 384-BIT, HDMI +DP, 2X8-PIN)

Summary

Accessibility

Eye care becomes more accessible with a broad network of doctors.

Efficiency

Timely diagnosis reduce delays in medical treatment.

Accuracy

Machine learning can identify signs of diseases with high accuracy.

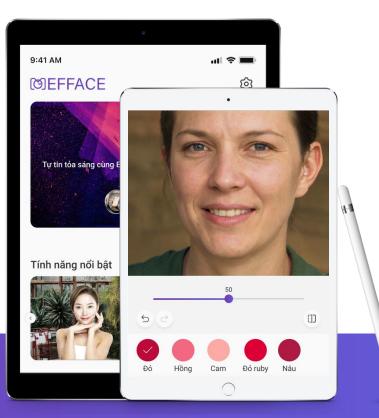

Cost-Effective

Timely diagnosis reduce treatment costs.

EFFACE - Al Photo Editor

Executive Summary

Situation

Photo editing complexity deters users from achieving desired results **quickly** and **without professional knowledge**.

Complications

It is crucial to create a user-friendly, **Al-driven** photo editing solution, enabling **creativity**, **saving time**, and ensuring **professional** results.

2

Question

How to develop a photo editing app for simplified, but also high-quality editing?

Answer

EFFACE - An intuitive UI and AI-power App for appealing photo editing with creative features, regular updates for AI improvements and user needs.

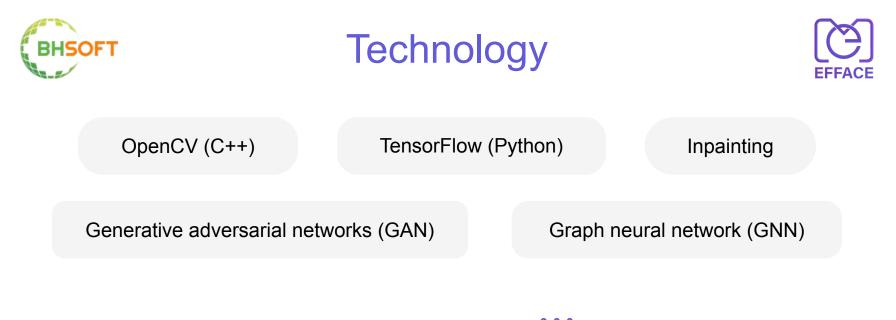

EFFACE

Automatic Object Removal and Background Replacement with Deep Convolutional Neural Networks and Feature Data Analysis

Al-Powered Perfection at Your Fingertips!

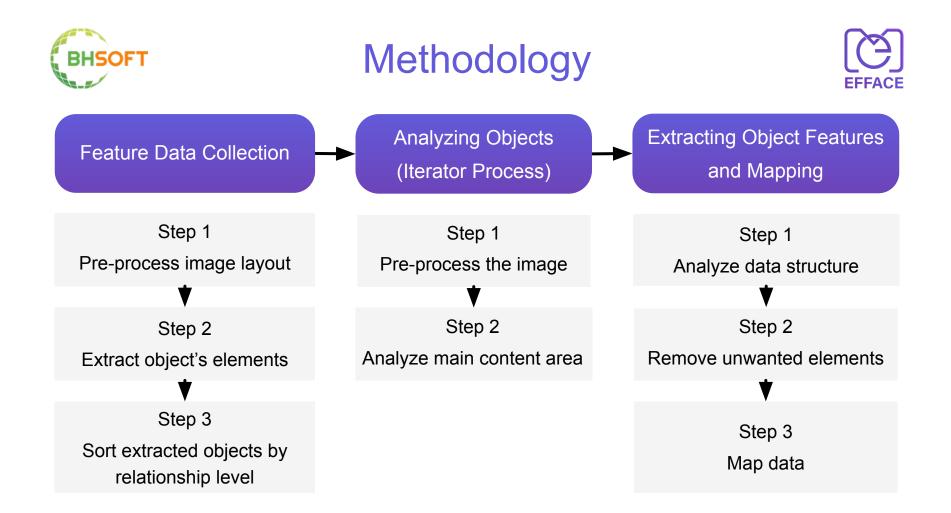

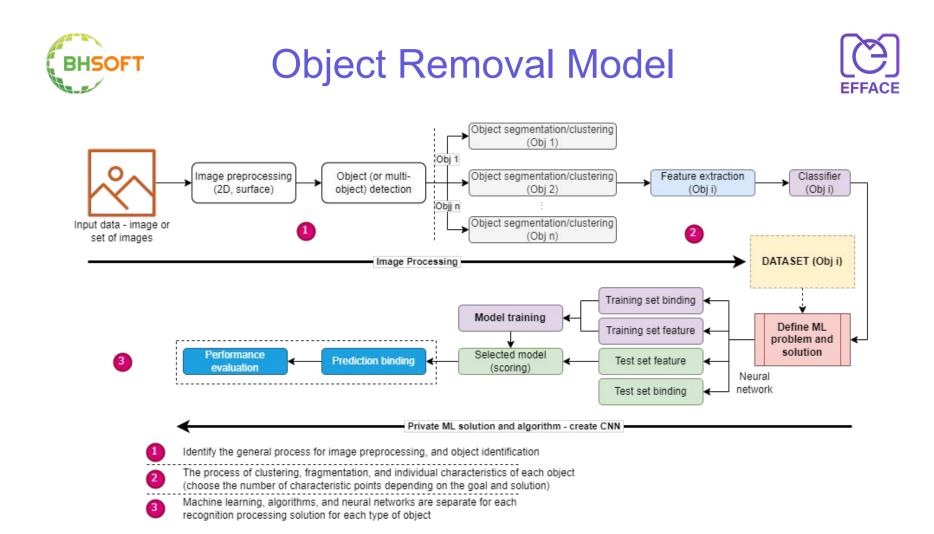

Team size 04 developers

Duration 12 months

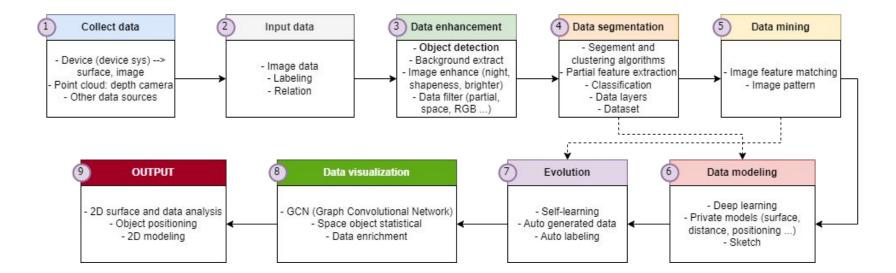

Big data analysis flow

ML Server Hardware Required

Mainboard Intel W480, Socket 1200, ATX, 4 RAM DDR4

CPU Intel Xeon W-1370P (3.6 GHz turbo up to 5.2 GHz, 8 cores 16 threads, 16MB Cache,

Comet Lake-S)

RAM 32GB DDR4

SSD 512GB M.2 + HDD 2TB

GPU RTX3090 (24GB GDD6X, 384-BIT, HDMI +DP, 2X8-PIN)

Summary

Quality Enhancement

Enhancing photos in only one click, instantly make blurry photos clear.

Time and Effort Savings

Aims to streamline editing process, saving users time and reducing manual effort.

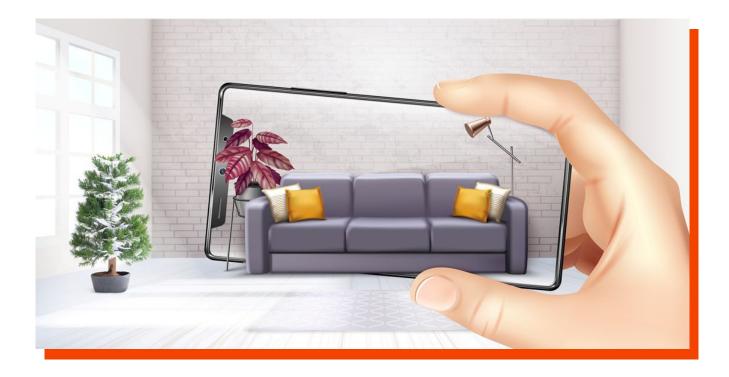

Simplified Editing

Emphasis on a straightforward UX, ensuring users can navigate without complexity. Creative Freedom

Promotes unlimited creativity, enabling users to craft visually appealing images.

Executive Summary

Situation

To identify suitable positions in physical space, people need to repeatedly move objects around, leading to **difficulties** in the process of **relocation and organization**.

Complications

When applying AR technology, challenges are uncertainties, hardware limitations, user adaptability issues, and the integration of virtual elements into real-world environments.

Question

How to **address the complexities** associated with virtually reconstructing space and objects in real-world environments?

Answer

MYOPIA – AR Camera 3D solution offering a seamless and effective user experience, contributing to the **successful integration into diverse environments**.

MYOPIA - AR Camera 3D Solution

- BHSoft has developed an Augmented Reality (AR) camera view application for both Android and iOS.
- Using the mobile app, users can take AR 3D objects from the library then drag and drop selected objects to a position in the room view.

Technology

Computer Vision & Image Processing

- TensorFlow
- PyTorch3D
- Keras
- COLMAP
- Marching Tetrahedra
- DMTet

Mobile Development

- Kotlin (for Android)
- Swift for (iOS)

Data Science Platform

Anaconda

Team size 03 developers

GPU Programming & Deep Learning Frameworks

- NVIDIA CUDA
- NVIDIA Instant NeRFs
- MeshLab

Database

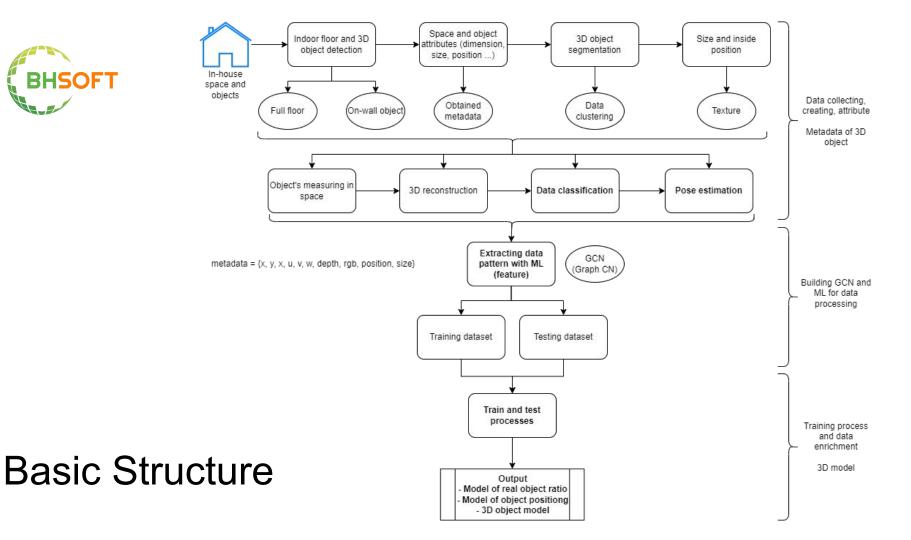

SQLite

Duration

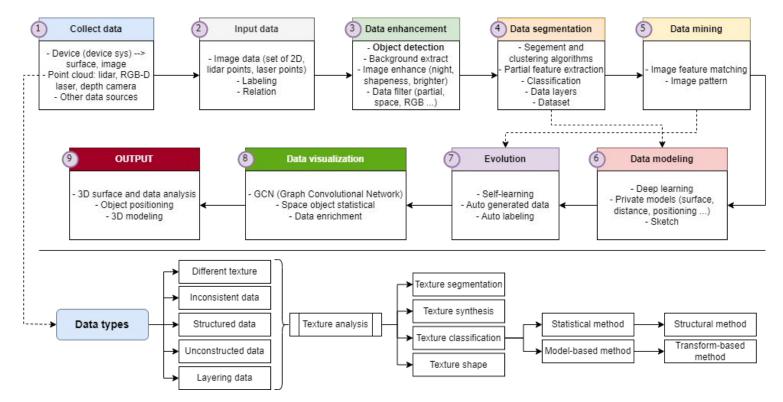

12 months

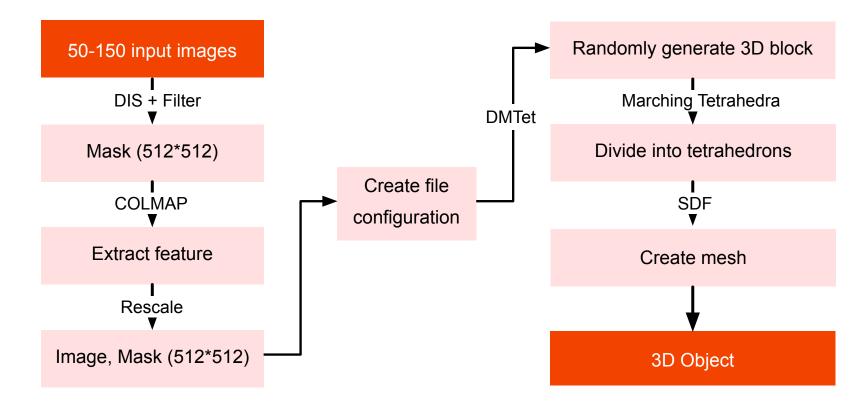

Big Data Analysis Flow

3D Model Shaping Process

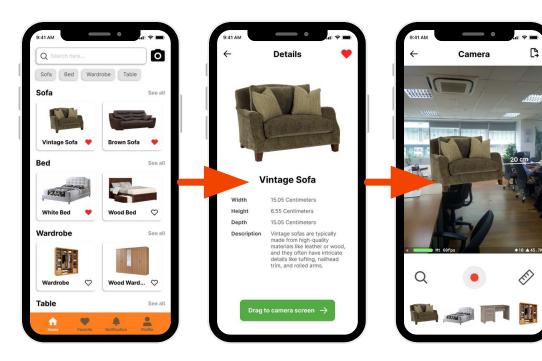

Key Features

Drag 3D objects from gallery to room view

- Zoom in
- Zoom out
- Switch positions
- Adjust proximity

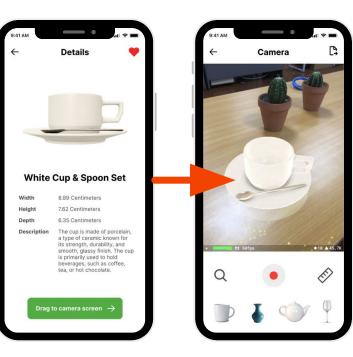

Key Features

2

Rotate 3D objects

- Rotate up
- Rotate down
- Rotate sideways

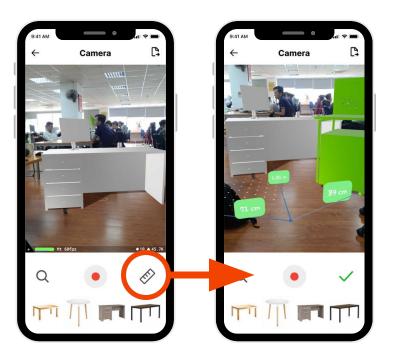

Key Features

Determine necessary distance when placing objects in indoor room view

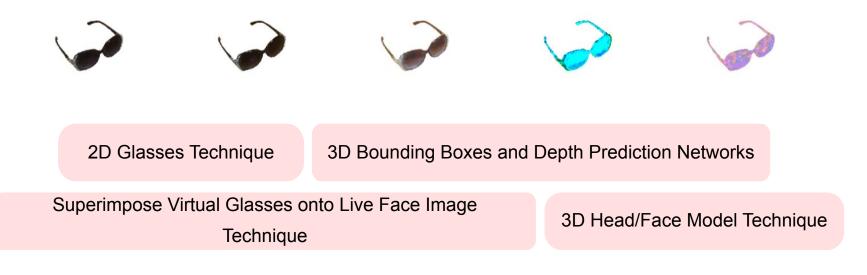

- Export parameters
- Record video of the process

Virtual Try On Glasses

BHSoft is now focusing on developing new features and enriching the libraries of 3D objects with a notable addition being Virtual Try On Glasses feature.

Equipment Required

ML Server Hardware Required

Mainboard Intel W480, Socket 1200, ATX, 4 RAM DDR4

CPU Intel Xeon W-1370P (3.6 GHz turbo up to 5.2 GHz, 8 cores 16 threads, 16MB Cache, Comet Lake-S)

RAM 32GB DDR4

SSD 512GB M.2 + HDD 2TB

GPU RTX3090 (24GB GDD6X, 384-BIT, HDMI +DP, 2X8-PIN)

Devices Required

iPhone (any version with Lidar)

Android (from version 9 and up)

Summary

Enhanced Vision

Improves visual clarity in real room view.

Real-Time Assistance

Provides dynamic and real-time information.

Customized Features

Offers customized features tailored to specific needs.

O Independence

Fosters autonomy, enabling independent navigation.
